DETAILED ACTION

1. This Office Action is in response to amendment received 08/26/2005.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach, suggest, or render obvious, *A method of caching dynamic data pages, the method comprising:*
 - a) receiving a data page from an origin server, wherein said data page includes page dependency data that contains one or more dependencies such that each dependency indicates an underlying data source which said data page is dependent on. wherein said page dependency data are generated by a Request-Based dependency generator which uses a configuration file corresponding to the origin server, wherein the configuration file is the only configuration file corresponding to the origin server;*
 - b) storing said data page;*
 - c) storing said page dependency data;*
 - d) receiving an event;*
 - e) determining if said event changes an underlying data source corresponding to one of said page dependency data; and*
 - f) updating the cache by refreshing or deleting said data page if said event changes one of the page dependency data.*
3. The most closely related prior art attributed to Bourne (U.S. Patent No. 6,584,548) in view of Schloss (U.S. Patent No. 6,249,844) fails to teach dependency statements

contained within individual dynamically-generated, dynamic-content containing web pages built by being identified through the use of a server-side, server manager configurable file which acts as a lookup table. Upon receipt of a URL, the server accesses the configuration file (lookup table) searching for a match. When a match is found, any corresponding dependency statements are added to the document, which is then generated

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
